

RARE OPPORTUNITY TO SEE, HEAR AND CHAT

WITH **CHARLIE PELLERIN**

Manager (for nearly a decade) of the team that built and launched the **NASA Hubble Space Telescope**

- Inventor • Research Astrophysicist
- Project Manager • Program Director
- University Professor

Presenting on

Tuesday 20th March, 2012

Novotel Brisbane, 200 Creek Street, Brisbane

Leadership Effectiveness & Program Project Management Conference

Graham Scott, Director ORG Consulting is hosting a rare opportunity for you to see, hear and chat with **Charlie Pellerin!**

How credible is Charlie? He has a distinguished career as an inventor, research astrophysicist, project manager, program director, university professor and is currently President of **4-D Systems**.

Charlie is travelling to Australia to help our society move as efficiently as possible through the inevitable coming transition. Will you help him with this task?

Get a head start by reading **Charlie's "5-Star"** book, **How NASA Builds Teams** (Wiley, 2009).

Charlie led the team that built and launched the **Hubble Space Telescope** (with the flawed mirror) for nearly a decade. He then mounted the space mission that repaired the flaw. **This flaw and the subsequent repair are central to the team building/leadership story.** *Hubble* is now in its 20th year of extraordinary science operations. Charlie's numerous awards include two NASA "**Outstanding Leadership Medals**" an honour bestowed to less than 50 people, including astronauts. NASA also awarded Charlie the "**Distinguished Service Medal**" given when "*any other form of recognition would be inadequate*".

Ever hear the expression, "If it seems too good to be true, it probably is?" Well, not in this case.

Come, hear the astounding **Dr Charles (Charlie) Pellerin**.

- The driver of (project) team performance is something that you probably have never thought about, the Fifth Force.
- How you can easily both measure and manage the Fifth Force and therefore your team's performance.
- Have you ever wondered why people say, "Leaders are born not made"? You will learn why people say this, why it is not true, and what you can do about it.

Charlie and I will aspire along with **Bob Dick, Peter Price, Richard Fryer, Brian Phillips, Brian Donaldson, Scott Spence** and **Pascal Rabbath**.

Manager (for nearly a decade) of the team that built and launched the **NASA Hubble Space Telescope**

- Inventor • Research Astrophysicist
- Project Manager • Program Director
- University Professor

- **Graham Scott**, Principal **ORG Consulting**, Organisational Psychologist/Consultant and recognised leader in Relationship Management in all types of projects. As well as being a Senior Lecturer at QUT, Graham has years of experience at the coal face and will relate his 'stories from the road'. A very practical and useful session on avoiding people issues in projects and what to do if they arise.
- **Bob Dick** who is a world renowned author, local hero, Organisational Psychologist / Consultant / Author 10 books in Organisational Psychology / Former Senior Lecturer in Organisational Psychology UQ. Bob is an independent scholar, occasional academic, specialist publisher, action researcher and consultant. Much of his work is focused on helping organizations and communities enhance their functioning. In all of these endeavours he helps others to improve their practice while doing what he can to improve his own. In his presentation he will be discussing his presentation "Leadership Development Through Action Learning".
- **Peter Price**, EGM Programming, Procurement and Services, ENERGEX, will be discussing "Practical Ways to Build a PMO, Energex Leading the Way'. His senior management experience has seen him involved in all aspects of the energy industry including capital planning and program delivery, asset management, procurement and regulatory issues. Peter has also held the position of Chair for **Energy Skills Queensland** since December 2007 and Chair for **Skillstech Australia** since July 2010.
- **Richard Fryer**, GM Organisational Effectiveness, ENERGEX, is an internationally experienced HR professional, specialising in Organisational Development and Performance. Richard will take you through "Leadership Effectiveness in Organisations & Programs" - a useful session on the challenges of running an effective leadership program within an organisation that is case-study based and looks at the work we are doing and likely to be doing in the near future...
- **Brian Phillips**, Managing Director, **Yellowhouse**, has a broad best management focus on MSP, P3O, MoV, MoP, Change Management, M_o_R and P3M3. His primary work is with **PRINCE2** and MSP, but he can bring a leadership understanding with the integration of governance, leadership, sponsorship and investment decision making. **Yellowhouse** is an Accredited Consulting Organization on Government panels for Maturity Assessment and Growth with P3M3 as well as working with Queensland Government on ICT Assurance Models for Program and Program Management. **Follow the Yellowhouse blog**
- **Brian Donaldson**, Organisational Psychologist/Consultant and Director of **Donaldson Consulting Group**, has the reputation of working with people to get results, fast; towards workable and pragmatic outcomes that appreciate capability, respect culture and build on roles performed. Brian is an MAICD and MAHRI; past National President for the Society for Organisational Learning Australia; a Consulting Practitioner and Mentor for the Cognitive Edge Centre for Organisational Complexity, and has been a Registered Psychologist for over 30 years.
- **Scott Spence**, CEO **CC Learning**, is an experienced trainer and author with over 10 year's project management experience (specializing in **PRINCE 2**) across a wide range of industries including IT, business and finance. These days he spends much of his time consulting with executives on program and project management, as well as writing and training others to become **PRINCE 2** trainers.
- **Pascal Rabbath, S-3**, who will be working on "The Key to Effective Program Management – Just Enough Process and No More!" which covers a brief navigation of the myriad standards and models that organisations use for business improvement. These include ISO9001, CMMI, People CMM including the importance of 'managing by data' and hence introduce the concept of having an ISO15939 compliant measurement program. This will introduce the PSM measurement methodology, the principles, tools and techniques it offers; and some key lessons learnt in building an effective measurement program.

COME meet and chat and "network" with this amazing man. Don't miss out on an opportunity to purchase an *autographed* copy of his 5-Star book '**How NASA Builds Teams**'.

Looking forward to welcoming and meeting you at the event on Tuesday 20th March, 2012.

Regards
